

SW060 Workgroup Meeting Summary

4/9/2015, 1:30 - 3:00 PM

Pensacola Conference Room

The meeting began with a review of the presentation that was initially viewed at the Solid Waste Conference (3/20/15), with some time for Q&A. After the overview of Phase II/SW060, we commenced the discussion with the Definitions. Below are the comments made at this time:

LAC 33:VII.115

Best Management Practices (BMP): suggested to say only "plan" instead of planning (Ron Hendrick).

Construction/Demolition (C&D) Debris: suggested to add "preserving chemicals" to help describe treated (Phyllis Luke). Also suggested was to make "treated" broader to include new materials.

Discard: suggested to delete this definition (Dwayne Johnson). This definition will be revisited again at a later time.

Environmentally Sound Manner: 1- do other states define this term? 2- the definition seems too broad. It was suggested we compare our definition to other neighboring states definition.

"Nuisance" is subjective (Joey Hebert). Change unacceptable to unreasonable (Henry Graham).

Fuel: instead of "such as", use "including but not limited to" (Henry Graham).

Impacted: change "which" to "at a concentration that" and add "as a result of human activities" after "RECAP" (Dwayne Johnson).

Non-Processing Transfer Station: strike "directly or indirectly" (Anita Peterson).
